DETAILED ACTION

This Office action is responsive to the Board of Interferences Judgment of December 13, 2001, wherein the current application received a favorable judgment in Interference file 104664.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by NOZAKI et al '416.

The claimed invention is drawn to an acid-sensitive polymer compound comprising: a film forming polymer, a carboxyl group bonding to a side chain of said polymer main chain, said carboxyl group having a protective group; and an additional acidic functional group bonding to a side chain of said polymer main chain, said acidic functional group having an acid-cleavable protective group; said carboxyl group having, as said protective group, a lactone structure represented by a formula in claim 1.

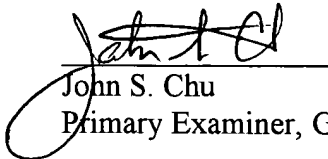

NOZAKI et al anticipates the claimed invention at Examples 1-16 wherein the mevalonic lactone methacrylate in the copolymer anticipates the claimed acid-sensitive polymer compound.
